

THIS IMPORTANT FACT FROM WILLIS NURSERY'S EXPERIENCE CAN BE VALUABLE TO YOU:

Field-grown Plants

(TRANSFERRED TO CLOVERSET POTS FOR
EASIER SELLING & EASIER TRANSPLANTING)

are **STURDIER AND MORE SATISFACTORY
THAN STOCK GROWN IN CONTAINERS**

We have found from long experience that nursery stock grown in the field and then transferred to containers is far better than stock that has grown only in containers. Stock grown in the field has a better chance to develop, has more room for root growth and more soil from which to draw its fertility; the matured plant is more robust, better able to withstand adverse conditions, and more satisfactory in every way.

For these reasons we grow only field-grown stock. For our retail sales, we transfer stock to Cloverset pots because we find them easier to handle ourselves, easier for the customer to carry home safely, and easier for them to remove at transplanting time. Since these pots keep the roots inside the pot, stock can be left in them indefinitely and will continue to thrive and grow.

WE RECOMMEND

Cloverset Pots!

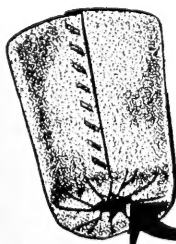

BECAUSE

THEY COMPLETELY PROTECT THE ROOTS OF THE GROWING PLANT from damage in the frames, in selling displays, in transportation to homes, and in transplanting. Even inexperienced hands can set out a Cloverset-potted plant without harming the delicate feeder roots.

THEY MAKE PLANTS EASIER TO SELL, AND EASIER TO BUY —

The trim appearance and sparkling dark color of Cloverset pots set off the plants to best advantage; they allow for proper drainage so that plants stay fresh and healthy — and plants in Cloverset pots are as easy to buy and carry home as a loaf of bread!

THEY STRETCH YOUR CASH-AND-CARRY SEASON, FOR MORE PROFITS, because plants well-started in Cloverset pots go right on growing as nicely as you please and may be offered for sale many months after they were originally potted, as well as right away. And they can be safely and easily transplanted at any time, in the customer's yard.

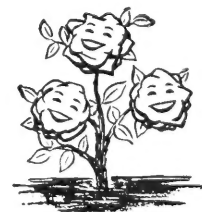

THIS EXCLUSIVE FEATURE insures healthy, growing plants. The bottom tabs on all Cloverset Pots seal in place after first watering, leaving correct opening for proper drainage.

For practical information on the varieties and sizes of stock best suited to potting in Cloverset pots, send for WILLIS NURSERY'S new WHOLESALE PRICE LIST.

FACTS ABOUT THE

NEW

Cloverset POTS--

THEY ARE ONE THIRD LIGHTER AND 20% STRONGER THAN BEFORE

Many of us consider Cloverset pots an essential part of our handling and selling operations, and we know that you will be interested, as we were, in the fact that these pots are now even better than before. Their new material has been tested by a nationally-known testing laboratory and has proved to be one-third lighter in weight and 20 per

cent stronger than the old standard weight pot. They are specially treated to stay pliable even when cold, and are so satisfactory for all uses that the old special light pots are no longer made. Check the "suggestion list" at the left, and see if you are taking full advantage of all the various kinds of cash-and-carry stock that can be profitably sold in Cloverset pots.

Suggestions as to types of stock suitable for potting in Cloverset pots

NO. 0 SMALL PERENNIALS: Canterbury Bells, Small Mums, Phlox, Violas, Delphinium, Carnations, Shasta Daisies, Columbine, etc.

IS YOUR SELLING SEASON TOO SHORT?

If your answer is -- "TOO Short" -- then do something about it! Extend your selling season by many weeks and make it possible to have plants available for landscape work all summer and fall.

You can pot an assortment of landscape material in Cloverset pots to overcome the disadvantage of not having stock available when your customers want it.

In the past, one of the biggest handicaps to the nursery business has been the short selling season. But the nursery business is making progress and the selling season has been extended by many weeks.

Nursery stock established in Cloverset pots is ready to sell at any time. You can give your customers the best values by transplanting field-grown shrubs, vines and trees to Cloverset pots. They will have better root systems and stronger tops.

For your convenience in making your selection to pot, we are enclosing a SPECIAL LIST of varieties and sizes especially recommended for planting in Cloverset pots. Pot in February or March and have the stock ready to sell by April.

Use the convenient order blank enclosed. Start your profit-making Cloverset program now. Order today.

(The nursery business is going to POT (s) for a longer selling season)
